**Overview**

Proximity Readers are ideal for applications utilizing legacy proximity systems or credentials. Operating at 125 kHz, these Proximity Readers are convenient and easily integrated into existing 125 kHz access control systems. Schlage Proximity Readers are compatible with most industry leading proximity credentials.

The XF1050 Proximity Mini-Mullion Reader is an attractive and cost effective reader well suited for door mullion or narrow stile mounting.

FEATURES AND SPECIFICATIONS

Durability/Warranty
The XF1050 is manufactured with the highest quality UV-resistant materials. These plastics inhibit discoloration in all types of environmental conditions, including direct sunlight. The readers feature potted electronics and circuitry for protection against inclement weather. We protect our customers with a limited lifetime warranty, providing full confidence in your reader products.
