

GT-1C7

Video Tenant Station

The GT-1C7 video tenant station is used to answer incoming calls, unlock the entrance, call the guard station(s), and trigger an optional output.

The guard station button calls any GT-MKB-N connected in the system. If a pull cord or panic call button are integrated, the GT-1C7 will emit an emergency tone when activated. There are also pan, tilt, zoom, and light control buttons to adjust the camera at the entrance.

Communication is either hands-free or push-to-talk. One GT-1C7 video tenant station and up to three audio tenant stations (GT-1A or GT-1D) can be used in the same suite or apartment.

- **7" LCD screen**
- **Hands-free communication**
- **Door release button**
- **Talk button**
- **Electrostatic guard call button**
- **Option button for external devices**
- **PTZ and brightness control**
- **Call tone volume control**
- **Communication volume control**
