## RapidPROX<sup>®</sup>

### ISO<sub>XT</sub> Card Imageable Proximity Card

#### Features:

Works with most HID 125kHz proximity readers.

Includes a professional inkjet or laser-engraved number.

Optional Magnetic Stripe.

Available in multiple formats.

Custom Printing Available.

Compatible with most direct image or thermal transfer printers.

Made in the USA.

Cards are made from genuine Atmel products, not clones.

Internal workings are welded, not glued (like cheaper cards).

Credentials are "passive" - Requires no batteries.

Standard 48-Hour Shipment  
Same-Day Shipment Available.

**LIFETIME WARRANTY**

**RapidProx<sup>®</sup>** Imageable Cards are extremely reliable, affordable and secure. Works with most HID<sup>®</sup> 125kHz readers, our credentials offer an alternative to the standard OEM brand. Included, are slot hole indicators on the horizontal and vertical orientations, showing precise positioning for a slot punch.

**RapidProx<sup>®</sup>** Imageable Cards are very thin. Measuring at 0.033", our ISO cards are comparable to the thickness of a credit card, making them ideal for storage in a wallet or purse.

**RapidProx<sup>®</sup>** Imageable Cards include a polyester core which makes these cards more durable than a standard PVC proximity card, thus more resistant to cracking and breaking.

**RapidProx<sup>®</sup>** Imageable Cards are manufactured with genuine Atmel products, not clones; and our internal workings are welded, not glued like inferior cards found elsewhere.

Durable White Imageable Card
